New angioplasty technique for diabetic patients

1369. SHRI MANOJ BHATTACHARYA:
SHRI C. RAMACHANDRAIAH:

Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether a new angioplasty technique has been developed by the doctors of the Ganga Ram Hospital, New Delhi to help the diabetic patients;

(b) if so, the details thereof; and

(c) the steps proposed to be taken to give it a wide publicity and extend the technique to major hospitals in the country so as to benefit vast majority of diabetic patients?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI): (a) and (b) the Indian Council of Medical Research has reported that Ganga Ram Hospital, New Delhi has formulated a new angioplasty technique called 'Subintimal angioplasty'. This has been devised by Dr. Aman Bolia, an Indian working in Leicester, United Kingdom and is hence called the "Bolia-Technique". Subintimal angioplasty differs from the usual intraluminal angioplasty because subintimal angioplasty is performed in the wall of the artery to create a new non-diseased channel underneath the diseased lumen area, whereas traditional angioplasty opens the narrowed lumen.

(c) Information in this regard will be collected and laid on the table of the house.
